

TECHNICAL ASSISTANCE

DAMEN SERVICES

REDUCING LIFE CYCLE COSTS

Allow us to assist managing the challenge of reducing your Life Cycle Costs by organising your maintenance, which is customised to your requirements and capacity.

DAMEN

TECHNICAL ASSISTANCE

REDUCING LIFE CYCLE COSTS

Damen Services has the right expertise to deliver Technical Assistance during your vessel's complete lifecycle.

Our technical assistance includes a broad range of services such as a technical survey, problem diagnosis, problem solving, preventive and corrective maintenance. We can make sure your vessel complies with Class Rules and can carry out safe and efficient docking assistance.

An initial survey provides you insight into the status of your vessel, its status related to Class Rules and helps to prevent unexpected breakdown. The survey indicates upcoming maintenance events to determine accurate budgets.

We assist in solving your technical challenges and assure your vessel is up and running as soon as possible, by

- Delivering highly skilled Damen Field Service Engineers
- Committing to fast problem solving
- Providing a worldwide services network

At the same time you benefit from learning on the job.

Besides our own pool consisting of a variety of maritime experts, we work closely together with all our suppliers.

When any additional knowledge or experience is required, we will cooperate with our suppliers to deliver the right solution. Based on your requirements we deliver the right person(s) for the job.

With Damen Technical Assistance, our customers have many advantages which lead to optimal vessel performance and reliability:

- Optimized planned downtime
- Fast problem solving
- Short and well organized docking periods
- High quality maintenance & repairs

Damen's Technical Assistance: first time right.
