

FAST YACHT SUPPORT VESSEL 6911

Types of works:

Detail Engineering: Hull, outfitting.

Period of engineering: 2015

The concept of beauty is completely subjective. Opinions of various shapes, colors, features followers often differ in the perception of beauty. However, when it comes to YS 6911 – connoisseurs' impressions coincide. It is beyond all questions - just look at his photo. So, let's consider what makes the project MDEM engineers were involved in 2015, so incredible.

YS 6911 – is a fast yacht support vessel. The 69.15m vessel is constructed with a steel hull and aluminium superstructure and designed for Owners looking for helicopter and dive centre capabilities while also retaining long-distance roaming capacity.

A sea axe bow ensures that YS 6911 is capable of tackling rough sea conditions at full power of 20 knots, with accommodation on board for 22 crew and staff for safe and comfortable journeys (22 persons). The project YS 6911 features the ultimate

technical area for serious superyacht helicopter operations – a fully enclosed hangar beneath the LY3 / MCA fully certified helideck. As well as the helicopter hangar, the extended 69-metre platform also includes a dedicated helicopter workshop below deck, a well-equipped dive centre, plus 250 square metres of deck space for tenders and toys, and 110 square metres of below deck storage.

General specifications

Length overall	69.15 m
Beam overall	11.48 m
Depth at sides	5.40 m
Draught	3.85 m
Deadweight cargo	up to 350.0 t
Deck area (not including the helipad)	250 m ²
Main engines	4x 2.240 kW
Speed	18-25 kn
Crew	up to 22 persons

The keel of the vessel vessels was laid down at the Damen Shipyard Gorinchem (Gorinchem, the Netherlands) built in 2016.
