DESCRIPTION
Damen’s Sunrain awning shed offers excellent protections against heat, wind, sunlight and rain during maintenance, service and constructional works. It is a relatively low investment and offers the pleasure of working in a protected environment, free from (most of) the weather influences.

The shed can be your designated solution for numerous situations and will be modified to each desired configuration or plot. Materialization choices will have to be determined in close collaboration with the customer.

CONSTRUCTION / FOUNDATION
This is all subject to the program of requirements, to the soil/surface and the purpose of the shed.
- Founded on piles or sheet pile foundation;
- Steel construction and (single layered) cladding;
- Concrete foundation works;
- Bearing & reinforced concrete floor or produced pavement.
